Dear Chris

Thanks for email, these matrices are available free for public use. We may provide these matrices to you for distribution.

With best wishes and regards

Raghava

Dear Dr. Raghava,

First, I wanted to thank you for your very valuable ProPred tool, which we've used quite a bit to effectively deimmunize therapeutic proteins (see e.g., <https://www.ncbi.nlm.nih.gov/pubmed/28607051> and <https://www.ncbi.nlm.nih.gov/pubmed/26000749>).

The purpose of this email though is to inquire as to the terms under which the ProPred matrices may be distributed. I couldn't gather from the website -- are these matrices considered to be "open access"? Of course, with citation upon use. I ask because we're preparing a release of deimmunization software, wrapping up predictors with protein design tools, and it would be smoothest for end users if we could just include the matrices with the release (again, pointing to your publications for citation). Alternatively, we could provide blank files and instructions for how to put such matrices into the files, but of course that's a bigger hassle.

Hope that is a clear enough question, and I appreciate your consideration.

Best,
Chris
